

- **Heading:**

Document name: Sprint 2 Report

Product name: GrocerEase

Team name: GrocerEase

Date: November 4th 2018

- **Actions to stop doing:**

Our team should spend more time attempting to troubleshoot issues outside of Scrum meetings. Sometimes our Scrum meetings get sidetracked by solving quick technical problems, which is not what we should be doing. Also, the team members should be prepared to answer the three main questions for Scrum every meeting, instead of having to ad-lib on the spot. These time saving measures would also make sure that our meetings are timeboxed to 15 minutes.

- **Actions to start doing:**

Our team should organize more group meetings outside of the Scrum ones. We had a couple this sprint, and they tremendously helped our project in terms of how far we got in a short span of time.

We need to also start writing more comments for the code that we are all individually coding. Without these, we're going to have a lot more issues later down the line.

- **Actions to keep doing:**

We should definitely keep up our communication standard, as the clear and open chats that we have open make sure that we're all up to date on our project. This helps us make sure we're on track and communicate anything we need to without much effort.

- **Work completed/not completed:**

User Story 1 (ingredient catalogue): not completed

User Story 2 (barcode scanner): not completed

User Story 3 (login): not completed

- **Work completion rate:**

Total number of user stories completed in previous sprint: None

Total number of estimated ideal work hours completed during prior sprint: 8 hours

Total number of days during the prior sprint: 7 days

Previous sprint user stories/day: 0.3

Ideal work hours/day: 1 hour
